Dr. Philip A. Munz,
Pomona College,
Claremont, California.

Dear Dr. Munz:

I have just at this moment returned from a highly successful botanical reconnaissance of the West side of the Colorado Desert. I found conditions for collecting at their very best in San Felipe Valley, Blair Valley, Mason Valley, and Vallecito, although I was too late for the vegetation in Borrego Valley.

I ~~have~~ made a large number of field observations of a very interesting character and obtained a fine collection.

I assume that you collected on your Providence Mts. trip and if you have duplicates I should be glad to arrange an exchange with you later on. The Providence Mts. area is one from which I should be specially glad to have material for use in the preparation of the Fldra of California.

With kind regards and best wishes,

Sincerely yours,

Willis L. Jepson.
